

HeatStat Room Thermostat & Underfloor Heating Stat

The HeatStat can operate as a stand-alone room thermostat with touch sensitive controls and innovative features. It provides two options for the installer as it can also operate as an electric underfloor heating thermostat as it is supplied with a floor probe. It is factory set to measure floor temperature a small change to the settings at time of installation and the HeatStat can be used as a room thermostat.

Product Features

- Room thermostat complete with floor probe
- Touch sensitive controls
- 5°C to 35°C range
- Switches 16A resistive load
- Automatic timer with boost mode
- Dedicated manual mode

HeatStat Room Thermostat with floor probe
